Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Officer's Responsibilities and Approval

I, B.M Mhlanga, accounting officer of the Govan Mbeki Local Municipality, am responsible for the preparation of the annual financial statements, which are set out on pages 5 to 84 in terms of section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the municipality.

The annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

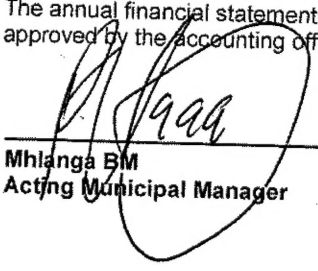

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

Our opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements

The municipality's cash flow forecast for the year beginning 1 July 2016 to 30 June 2017 and, in the light of this review and the current financial position and revenue enhancement activities the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The Accounting officer certify that the salaries, allowance and benefits of councilors as disclosed in the note of these Annual Financial Statement are within the upper limit of the framework envisaged in section 219 of the Constitution, read with the Remuneration of Public Office Bearers At, Act No.20 of 1998.

The annual financial statements set out on pages 5 to 87, which have been prepared on the going concern basis, were approved by the accounting officer on August 31, 2017.

Mhlanga BM
Acting Municipal Manager

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Officer's Report

The accounting officer submits his report for the year ended June 30, 2017.

1. Review of activities

Main business and operations

Net deficit of the municipality was R 632,031,775 (2016: deficit R 216,116,524 restated).

2. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

The accounting officer is aware of circumstances arising since the end of the financial year. Details of the events are disclosed in the notes of the annual financial statements.

4. Public Private Partnership

The municipality did not have any public private partnerships as at end of reporting period.

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period. The details of any changes in accounting policies are explained in the relevant policy.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade and other receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables calculated on risk basis taking into account the number cut-offs, handed over status, indigent and payment ratio of each consumer debtor. The amount of loss is measured as the difference between the consumer debtor carrying amount and the estimated future cash flows.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of service potential expected to be realized from distribution or use.

Fair value estimation

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Impairment testing

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In making the above mentioned estimates and judgement, management considers the subsequent measurement criteria and indicators of potential impairment losses as set out in GRAP 17 (Property, Plant and Equipment), GRAP 12 (Inventory), GRAP 31 (Intangible Assets), GRAP 26 (Impairment of cash generating assets) and GRAP 21 (Impairment of Non Cash Generating Assets). In particular, the calculation of the recoverable service amount for property, plant and equipment and intangible assets and the net realisable value for inventories involves significant judgement by management.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 19 - Provisions.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.2 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of property, plant and equipment

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 9.

Effective interest rate

The municipality use the government bond rate to discount future cash flows.

Allowance for debt impairment

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.3 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.3 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value of investment property reflecting market conditions at the valuation roll period of the municipality and annually updated with amendments of supplementary valuation roll.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

The gain or loss arising from the derecognition of investment property is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the investment property. Such difference is recognised in surplus or deficit when the investment property is derecognised.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, including the nature or type of properties classified as held for strategic purposes, are as follows:

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost at acquisition date or in the case of donated assets or assets acquired by grant, the deemed cost being the fair value of the asset on initial recognition.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site in which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.4 Property, plant and equipment (continued)

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses. Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the municipality and cost or fair value of the subsequent expenditure can be reliably measured. Expenditure incurred is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces major parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight line	Indefinite
Buildings	Straight line	30 years
Landfill site	Straight line	24 years
Infrastructure	Straight line	10-30 years
Community	Straight line	15-30 years
Other property, plant and equipment	Straight line	3-15 years

The municipality shall assess at each reporting date whether there is any indication that the expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the entity shall revise the expected useful life and/or residual value accordingly.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.5 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.5 Site restoration and dismantling cost (continued)

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.6 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the municipality intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale,
- there is an intention to complete and use or sell it,
- there is an ability to use or sell it,
- it will generate probable future economic benefits or service potential,
- there are available technical, financial and other resources to complete the development and to use or sell the asset,
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.6 Intangible assets (continued)

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight line	5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal

The gain or loss arising from the precognition of an intangible assets is determined as the difference between the net disposal proceeds, if any, and carrying amount of the intangible asset. Such difference is recognised in surplus or deficit when the asset is derecognised.

1.7 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets Heritage assets that qualifies for recognition as an asset shall be measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Impairment

The municipality assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the precognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the item is derecognised

1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.8 Financial instruments (continued)

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the municipality shall estimate cash flows considering all contractual terms of the financial instrument but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument or group of financial instruments, the municipality shall use the contractual cash flows over the full contractual term of the financial instrument or group of financial instruments.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest in another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.8 Financial instruments (continued)

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Consumer receivables	Financial asset measured at amortised cost
Cash and cash equivalent	Financial asset measured at amortised cost
Long term receivables	Financial asset measured at amortised cost
Other receivables from exchange transactions	Financial asset measured at amortised cost
Other receivables from non-exchange transactions	Financial asset measured at amortised cost
Other financial assets	Financial asset measured at fair value

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Payables from exchange transactions	Financial liability measured at amortised cost
Payables from non-exchange transactions	Financial liability measured at amortised cost
Other financial liabilities (Loan)	Financial liability measured at amortised cost
Value Added Tax	Financial liability measured at amortised cost
Financial lease	Financial liability measured at amortised cost

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.8 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest rate method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility in the case of a financial asset.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.8 Financial instruments (continued)

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Where financial assets are impaired through use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such financial assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition

Financial assets

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. Title may or may not eventually be transferred. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.9 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease term.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

1.10 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.10 Inventories (continued)

Water inventory

Water is regarded as inventory when the municipality purchases water in bulk with the intention to resell it to the consumers or to use it internally, or where the municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes, etc). However, water in dams, that are filled by natural resources and that has not yet been treated, that is under the control of the municipality but cannot be measured reliably as there is no cost attached to the water, is therefore not recognised in the statement of financial position

The basis of determining the cost of water purchased and not yet sold at reporting date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventory to its present location and condition, net of trade discounts and rebates.

Water and purified effluent are valued by using the first-in-first-out method, at the lowest of purified cost and net realisable value, insofar as it is stored and controlled in reservoirs at year-end.

Other arrangements

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values and sold by public auction. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Differences arising on the valuation of inventory are recognised in the statement of financial performance in the year in which they arise. The amount of any reversal of any write down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

1.11 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity. It generates a commercial return.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.11 Impairment of cash-generating assets (continued)

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs.

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.11 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.12 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity. It generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.12 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value, on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.13 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Termination benefits are employee benefits payable as a result of either:

- a municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.13 Employee benefits (continued)

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the municipality recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognise the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.13 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.13 Employee benefits (continued)

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.14 Provisions and contingencies (continued)

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

Contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is:

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality; or
- a present obligation that arises from past events but is not recognised because:
 - it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation;
 - the amount of the obligation cannot be measured with sufficient reliability

Contingent assets and contingent liabilities are not recognised however disclosed in the notes of the financial statements. Contingencies are disclosed in note 47.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.14 Provisions and contingencies (continued)

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity test the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.11 and 1.12.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.15 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.16 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Rendering of services by the municipality includes, but not limited to income from agency fees, rentals, incidental income and other income.

Interest and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Dividends or their equivalents are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

1.17 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.17 Revenue from non-exchange transactions (continued)

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.17 Revenue from non-exchange transactions (continued)

Rates including collection charges and penalties

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Grants

Revenue received from conditional grants, donations and funding is recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Unconditional grants and receipts are recognised upon receipt.

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.18 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset when it is probable that they will result in future economic benefits or service potential to the municipality, and the costs can be measured reliably. The municipality applies this consistently to all borrowing costs that are directly attributable to the acquisition, construction, or production of all qualifying assets of the municipality. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value or replacement cost, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets and Inventories as per accounting policy number 1.10, 1.11 and 1.12. In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

Capitalisation is suspended during extended periods in which active development is suspended.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

When the municipality completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the municipality ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.19 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.20 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.21 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Irregular expenditure

Irregular expenditure is expenditure incurred that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.22 Irregular expenditure (continued)

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.23 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.24 Budget information

The approved budget is prepared on a accrual basis and presented by programmes linked to performance outcome objectives.

The approved budget covers the fiscal period from 7/1/2016 to 6/30/2017.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

1.25 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.26 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Accounting Policies for the year ended 30 June 2017

1.26 Events after reporting date (continued)

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Figures in Rand

2017

2016

2. Change in accounting policy

The municipality changed its accounting policy with respect to the disposal of vacant land (investment property). The municipality now applies the policy to ensure that the purchaser needs to sign an agreement with the municipality and pay the agreed selling price in full before risks and rewards are transferred and the property transferred out of the municipality's records. Prior to this change in policy, the municipality transferred the property to the third party once the agreement is signed and the payment was not considered.

The impact of this voluntary change in accounting policy on the financial statements is primarily to reduce trade receivables from exchange transactions which were created in the past for all payments received in advance. This change did not result in a material impact on the current year or any years included within these financial statements. The change in accounting policy has been applied retrospectively by restating the comparative figures accordingly.

The aggregate effect of the changes in accounting policy on the annual financial statements for the year ended June 30, 2016 is as follows:

Statement of financial position

Assets

Investment Property	857,000
Property, plant and equipment	805,512
	1,662,512

Current Assets

Trade and other receivables	(2,874,398)
-----------------------------	-------------

Current liabilities

Trade Payables	(12,045,520)
VAT Payables	1,832,271
	(10,213,249)

Accumulated surplus

Opening accumulated surplus	(86,825)
-----------------------------	----------

Statement of Financial Performance

Revenue

Profit or Loss on sale of asset	11,511,960
---------------------------------	------------

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

3. New standards and interpretations

3.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

GRAP 108: Statutory Receivables

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality has adopted the standard for the first time when the Minister sets the effective date for the standard.

The impact of the standard is not material.

GRAP 17 (as amended 2015): Property, Plant and Equipment

Based on the feedback received as part of the post-implementation review, the Board agreed to reconsider certain principles in GRAP 16 and GRAP 17. In particular, the Board agreed to:

- Review the principles and explanations related to the distinction between investment property and property, plant and equipment.
- Consider whether an indicator-based assessment of useful lives of assets could be introduced.
- Clarify the wording related to the use of external valuers.
- Introduce more specific presentation and disclosure requirements for capital work-in-progress.
- Review the encouraged disclosures and assess whether any should be made mandatory or deleted.
- Require separate presentation of expenditure incurred on repairs and maintenance in the financial statements.

Amendments identified as part of the post-implementation review, affected the following areas:

- Indicator-based assessment of the useful lives of assets
- Use of external valuers
- Encouraged disclosures
- Capital work-in-progress
- Expenditure incurred on repairs and maintenance

The effective date of the standard is for years beginning on or after April 01, 2016.

The municipality has adopted the standard for the first time in the 2017 annual financial statements.

The impact of the standard is set out in note 2 Changes in Accounting Policy.

GRAP 16 (as amended 2015): Investment Property

Based on the feedback received as part of the post-implementation review, the Board agreed to reconsider certain principles in GRAP 16 and GRAP 17. In particular, the Board agreed to:

- Review the principles and explanations related to the distinction between investment property and property, plant and equipment.
- Consider whether an indicator-based assessment of useful lives of assets could be introduced.
- Clarify the wording related to the use of external valuers.
- Introduce more specific presentation and disclosure requirements for capital work-in-progress.
- Review the encouraged disclosures and assess whether any should be made mandatory or deleted.
- Require separate presentation of expenditure incurred on repairs and maintenance in the financial statements.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

3. New standards and interpretations (continued)

Various amendments were made to the Standard, affecting Definitions, Identification, Disclosure, Effective date and Transitional provisions.

The effective date of the standard is for years beginning on or after April 01, 2016.

The municipality has adopted the standard for the first time in the 2017 annual financial statements.

The impact of the standard is not material.

3.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after July 01, 2017 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
<ul style="list-style-type: none">• Directive 12: The Selection of an Appropriate Reporting Framework by Public Entities• GRAP 20: Related parties	April 01, 2018	Impact is currently being assessed
<ul style="list-style-type: none">• GRAP 26 (as amended 2015): Impairment of cash-generating assets• GRAP 109: Accounting by Principals and Agents	April 01, 2017	Not expected to impact results but may result in additional disclosure
<ul style="list-style-type: none">• GRAP 21 (as amended 2015): Impairment of non-cash-generating assets• GRAP 18: Segment Reporting	April 01, 2017	Impact is currently being assessed
	April 01, 2017	Impact is currently being assessed
	April 01, 2017	Not expected to impact results but may result in additional disclosure

GRAP 105: Transfers of functions between entities under common control

The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. It requires an acquirer and a transferor that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying the acquirer and transferor, Determining the transfer date, Assets acquired or transferred and liabilities assumed or relinquished, Accounting by the acquirer and transferor, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after April 01, 2015.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

GRAP 106: Transfers of functions between entities not under common control

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

3. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after April 01, 2015.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

GRAP 107: Mergers

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after April 01, 2015.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

9. Employee benefit obligations

Defined benefit plan

Post retirement medical aid plan

The municipality provides certain post - retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the medical aid funds, with which the municipality is associated, a member who is on the current conditions of service is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee.

The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit funding method.

At the valuation date individuals entitled to a post - retirement medical aid subsidy were:

In - service (employee) members.

In - service (employee) non - members.

Continuation (retiree and widow) members.

The amounts recognised in the statement of financial position are as follows:

Carrying value

Present value of the defined benefit obligation-wholly unfunded	(48,361,864)	(50,599,864)
Present value of the defined benefit obligation-partly or wholly funded	(1,115,000)	(1,316,000)
	(49,476,864)	(51,915,864)
Non-current liabilities	(48,361,864)	(50,711,864)
Current liabilities	(1,115,000)	(1,204,000)
	(49,476,864)	(51,915,864)

Valuation of assets

At the valuation date, the medical aid liability of the Municipality was unfunded, i.e. no dedicated assets had been set aside to meet this liability.

Changes in the present value of the defined benefit obligation are as follows:

Opening balance	(51,915,864)	(50,599,864)
Benefits paid	3,781,000	3,252,000
Net expense recognised in the statement of financial performance	(1,342,000)	(4,568,000)
	(49,476,864)	(51,915,864)

Net expense recognised in the statement of financial performance

Current service cost	(1,204,000)	(1,168,000)
Interest cost	(4,507,000)	(4,500,000)
Actuarial (gains) losses	4,369,000	1,100,000
	(1,342,000)	(4,568,000)

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	9.47 %	9.01 %
Consumer Price Inflation	6.85 %	7.20 %
Health care cost inflation	7.85 %	8.20 %
Net discount rate	1.50 %	0.75 %

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

2017

2016

9. Employee benefit obligations (continued)

The determination of the investment returns are as per market yields at balance sheet date on government bonds. Two most important financial variables used in our valuation are the discount and medical aid inflation rates, the zero coupon yield curve from Johannesburg Stock Exchange were used to determine the discount rates and CPI assumptions.

The discount rate determined by using the Bond Exchange Zero Coupon Yield Curve as at 30 June 2017 is 9.47% per annum

The yield on inflation linked bonds of a similar term was about 2.45% per annum, implying an underlying expectation of inflation of 6.85% per annum.

A healthcare cost inflation rate of 7.85% was assumed. This is 1.0% in excess of the expected inflation over the expected term of the liability. It is the relative levels of the discount rate and healthcare inflation to one another that are important rather than the nominal values. It has thus assumed a net discount factor of 1.50% per annum.

The average retirement age for all active employees was assumed to be 63 years. This assumption implicitly allows for ill-health and early retirements. It was assumed that post employment health care subsidy would be at 100% of active employees or their surviving dependents.

Actuarial gains

Changes in economic variables

The changes in net discount rate from last years valuation to the current year reduced the liability by R 4 741 000

The health benefit inflation was lower than assumed in the prior valuation and the effect was a decrease in the liability by R 18 000.

The net effect of miscellaneous items resulted in an increase to the liability by R 2 631 000.

Changes in membership – There were a few changes in the membership over the past financial years changes resulted in a decrease in the liability of around R 2 241 000.

Sensitivity analysis

The valuation is only an estimate of the cost of providing post-employment medical aid benefits. The actual cost to the Municipality will be dependent on actual future levels of assumed variables i.e

- 20% increase/decrease in the assumed level of mortality;
- 1% increase/decrease in the Medical Aid inflation

Withdrawal rate

The 20% decrease and 20% increase in the withdrawals assumption will result in will result in 0.86% increase and 0.80% decrease in the accrued liability respectively.

Health care cost inflation

The valuation basis assume that the health care cost inflation rate will increase by 1. Therefore 1% increase in health care inflation assumption will result in 11.53% increase in the accrued liability and 1% decrease in health care inflation assumption will result in 9.75% decrease in the accrued liability.

Withdrawal rate

	-20% Withdrawal rate	Valuation assumptions	+20% Withdrawal rate
Total Accrued Liability	49,079,000	49,476,000	49,909,000
Current Service Cost	1,074,000	1,115,000	1,161,000
Interest Cost	4,471,000	4,508,000	4,549,000
	54,624,000	55,099,000	55,619,000

10. Long term receivables

Credit quality of long term receivables

The credit quality of long term receivables from exchange transactions that are either past due or impaired can be assessed for indicators of impairment. The municipality considers that the above financial assets that are not impaired at each of the reporting dates under review are of good credit quality. The municipality continuously monitors consumers and identified groups by reference to average payment history and incorporates this information into its credit risk control. No external credit rating is performed. Long term receivables include debtors with signed debt arrangement and/or handed over to lawyers

The municipality enforces its approved credit policy to ensure the recovery of long term receivables. The balance of long term receivables are as follows.

Summary of long term debtors

Gross long term receivables	88,130,529	130,005,397
Less: Allowance for impairment	(84,420,886)	(88,756,917)
	3,709,643	41,248,480

14. Consumer debtors (continued)

Credit quality of consumer debtors

The credit quality of consumer receivables from exchange transactions that are neither past nor due nor impaired can be assessed for indicators of impairment. The municipality considers that the above financial assets that are not impaired at each of the reporting dates under review are of good credit quality. The municipality continuously monitors consumers and identified groups by reference to average payment history and incorporates this information into its credit risk control. No external credit rating is performed.

Consumer receivables are billed monthly. No interest is charged on consumer receivables until the 7th day of the following month. Thereafter interest is charged at a rate determined by council on the outstanding capital amount exclusive of interest. Assessment rate receivables are billed monthly. No interest is charged on these receivables until the 7th day of the following month. Thereafter interest is charged at a rate determined by council on the outstanding balance.

The municipality enforces its approved credit control policy to ensure the recovery of consumer receivables. Deposits are required to be paid for all water accounts opened.

None of the financial assets that are fully performing have been renegotiated in the last year

15. Cash and cash equivalents

Cash and cash equivalents consist of:

Cash on hand	21,810	21,350
Bank balances	35,535,212	11,968,318
Short-term deposits	3,829,751	3,000,559
	39,386,773	14,990,227

Cash and cash equivalents pledged as collateral

Total financial assets pledged as collateral for post office mailing account	300,000	300,000

Current liabilities	2,602,656	2,445,387
	3,083,460	5,528,847

It is municipality policy to lease certain equipment under finance leases.

The average lease term was 3 years and the average effective borrowing rate was 10% (2016: 10%).

Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 4.

17. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprises of:

Unspent conditional grants and receipts		
Municipal Infrastructure Grant	916,535	2,951,830
Sports & Development Grant	453,685	453,685
Energy Efficiency & Demand Side Management	-	10,000

18. Other financial liabilities (continued)

Current liabilities

At amortised cost	1,585,291	1,409,806
-------------------	-----------	-----------

19. Provisions for landfill site

Reconciliation of provisions for landfill site - 2017

	Opening Balance	Utilised during the year	Reversed during the year	Change in discount factor	Total
Landfill site	90,033,246	(11,594,757)	3,729,420	1,776,522	83,944,431

Reconciliation of provisions for landfill site - 2016

	Opening Balance	Utilised during the year	Reversed during the year	Change in discount factor	Reduction due to re- measurement or settlement without cost to entity	Total
Landfill site	90,475,510	(13,094,518)	2,423,069	5,024,054	5,205,131	90,033,246

Non-current liabilities	81,333,759	88,267,578
Current liabilities	2,610,672	1,765,668
	83,944,431	90,033,246

Landfill site rehabilitation provision

The municipality will incur licensing and rehabilitation cost of R 83 944 430 (2016: R90 033 245) to restore landfill sites at the end of their use. As at 30 June 2017, this liability will be incurred over 0 to 35 years. Provision has been made for the net present value of the expenditures expected to be required to settle the obligation using the average cost of borrowings.

In the current year the waste management team accurately accounted for waste dispositions in the landfill sites. The increased accuracy in volumes of waste dumped at these sites resulted in more accurate site life calculations. The effect of the changes resulted in decrease in provisions by R 11 594 757.

The net discount rate increased from 1.97% to 3.11% and thus decreased the liability as at 30 June 2017.

The priced quotations used to quantify the rehabilitation costs and closure costs increased in the financial year. The net effect of the increase was R 1 817 288.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand	2017	2016
-----------------	------	------

20. Long service award liability

The municipality operates a defined benefit plan for all its employees. The long service award liability is not a funded arrangement, i.e. no separate assets have been set aside to meet its liability.

Under the plan, a long service award is payable after 10 years of continuous service and every 5 years thereafter, until 45 years of service (inclusive) to employees. Furthermore, a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of a long service based on historical staff turnover. No other long service benefits are provided to employees.

The Projected Unit Credit funding method has been used to determine the past-service liabilities at the valuation date and the projected annual expense in the year following the valuation date.

At year end, 1,326 (2016: 1,348) employees were eligible for long service awards.

Valuation of liabilities

Accrued liabilities are defined as the actuarial present value of all benefits expected to be paid in future based on service accrued to the valuation date and awards projected to retirement date. In determining these liabilities, due allowance has been made for future award increases. For each employee, this projection is based on the probability of being employed at each service award date, taking into account the assumed rates of withdrawal, early retirement and death.

Valuation of assets

As at the valuation date, the long service leave award liability of the Municipality was unfunded, i.e. no dedicated assets have been set aside to meet this liability

The amounts recognised in the statement of financial position are as follows:

Carrying amount

Opening balance	(24,479,000)	(23,954,000)
Increase in long service award liability	(2,161,000)	(525,000)
	(26,640,000)	(24,479,000)
Non current liabilities	(24,363,000)	(22,292,000)
Current liabilities	(2,277,000)	(2,187,000)
	(26,640,000)	(24,479,000)

Changes in the present value of the long service award liability are as follows:

Opening balance	(24,479,000)	(23,954,000)
Benefits paid	1,926,000	2,444,000
Net expense recognised in the statement of financial performance	(4,087,000)	(2,969,000)
	(26,640,000)	(24,479,000)

Net expense recognised in the statement of financial performance

Current service cost	(2,187,000)	(2,306,000)
Interest cost	(2,208,000)	(2,186,000)
Actuarial gains/ (losses)	308,000	1,523,000
	(4,087,000)	(2,969,000)

The accrued liability is determined on the basis that each employee's long service benefit accrues uniformly over the working life of an employee up to the end of the interval at which the benefit becomes payable. Further it is assumed that the current policy for awarding long service awards remains unchanged in the future.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

2017

2016

20. Long service award liability (continued)

The discount rate determined by using the Bond Exchange (JSE) Zero Coupon Yield Curve as at 30 June 2017 is 8.45% per annum. The assumed discount rate used at the previous valuation, 30 June 2016, was 9.39% per annum.

At 30 June 2017 the yield on inflation-linked bonds of a similar term was about 2.47% per annum. This implies an underlying expectation of inflation of 5.84% per annum $([1 + 8.45\%] / [1 + 2.47\%] - 1)$.

It was assumed that salary inflation would exceed general inflation by 1.0% per annum, i.e. 6.84% per annum. However, it is the relative levels of the discount rate and healthcare inflation to one another that are important, rather than the nominal values. We have thus assumed a net discount factor of 1.51% per annum $([1 + 8.45\%] / [1 + 6.84\%] - 1)$.

Actuarial gain can be attributed to the following factors

Changes in economic variables increased the liability.
Increase in employees entitled to other long service award benefits.

Financial variable

Discount Rate	8.45%	9.39%
CPI (Consumer price inflation)	5.84%	7.52%
Normal salary increase rate	6.84%	8.52%
Net effective discount rate	1.51%	1%
Expected retirement age - female	63	63
Expected retirement age - male	63	63

Sensitivity analysis

The valuation is only an estimate of the cost of providing Long service leave award benefits. The actual cost to the Municipality will be dependent on actual future levels of assumed variables and the demographic profile of the membership. In order to illustrate the sensitivity of our results to changes in certain key variables, the liabilities were recalculated using the following assumptions:

- 20% increase/decrease in the assumed level of withdrawal rates;
- 1% increase/decrease in the Normal Salary cost inflation.

Withdrawal rate

Deviations from the assumed level of withdrawal experience of the eligible employees will have a large impact on the actual cost to the Municipality. If the actual rates of withdrawal turns out to be higher than the rates assumed in the valuation basis, then the cost to the Municipality in the form of benefits will reduce and vice versa. We have illustrated the effect of higher and lower withdrawal rates by increasing and decreasing the withdrawal rates by 20%.

Normal salary inflation

The cost of the long service awards is dependent on the increase in the annual salaries paid to employees. The rate at which salaries increase will thus have a direct effect on the liability of future retirees. We have tested the effect of a 1% p.a. change in the Normal Salary inflation assumption.

The effect of the above is as follows:

Withdrawals

	-20% Withdrawal rate	Valuation Assumptions	+20% Withdrawal rate
Total Accrued Liability	25,324,000	26,640,000	28,110,000
Current Service Cost	2,125,000	2,277,000	2,452,000
Interest Cost	2,018,000	2,129,000	2,253,000
	29,467,000	31,046,000	32,815,000

49. Change in estimate

Property, plant and equipment

GRAP 17: Property, Plant and Equipment requires that the review of the remaining useful life of an item of property, plant and equipment to be conducted at least at each financial year end. Such review has been completed and the following results were achieved.

Change in depreciation resulting from reassessment of useful lives. The following categories are affected:

	Value derived using the original estimate	Value derived using amended estimate	R-value impact of change in estimate
Library books	430,001	207,178	222,823
Computer equipment	1,044,564	364,675	679,889
Transport Assets	3,742,227	1,339,158	2,403,069
Other machinery and equipment	2,171,485	790,739	1,380,746
Furniture and office equipment	2,252,150	771,786	1,480,364
Buildings	308,148	127,100	181,048
Electricity	194,009	94,291	99,718
Roads and Stormwater	1,131,709	458,431	673,277
Cemetery	6,675	3,023	3,653
Airport	18,421	6,151	12,269
Water	2,457	874	1,583
	11,301,846	4,163,406	7,138,439

Change in depreciation resulting from reassessment of residual value. The following categories are affected:

	Value derived using the original estimate	Value derived using amended estimate	R-value impact of change in estimate
Transport Assets	-	140,686	140,686
Other machinery and equipment	-	739	739
	-	141,425	141,425

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

50. Prior period errors

1. Landfill site

Useful lives of the landfill site as per the asset register of 2016 not correctly aligned to the useful lives included in the Landfill Rehab & Closure Provisions report of 2016. The effect of the correction was increase in the Landfill site assets, decrease in the accumulated depreciation and decrease in depreciation with an amount of R 756 367.75.

2. Assets Under Construction

Construction of sports and recreational community hall (multi-purpose centre) in Emzinoni was incorrectly unbundled in the prior year, practical completion certificate was used instead of the final completion certificate. The effect of correction increased Property, plant and equipment R 5 879 and decrease in depreciation by R 5 879.

3. Library books

During the assets verification process Library books were found on the floor and not in the asset register. The newly found assets were valued to R 91 657. The effect of the correction resulted in an increase in Library goods by R 91 657, increased depreciation by 10 184 and increased accumulated depreciation by R 20 196 and decrease in accumulated surplus by R 81 645.

4. Land

Reversing of the disposal in the prior period and correctly disposing the property in the current year as a result of the amendment in deed of sale. The effect of the correction decreased land by R 722 220, increased creditors by R 171 000, decrease in profit on sale of assets by R 144 546.19, decrease in vat liability by R 21 000 and decrease opening accumulated surplus by R 727 674.

5. Movable

Assets written off by insurance not removed from the asset register after the claim was approved. The correction resulted in a decrease of Property, Plant and Equipment by R 25 760, decrease in depreciation by R 4 912 and increase loss on disposal of assets by R 30 673.

Assets stolen in Kinross storeroom and reported in August 2015 was not removed from the asset register in the 2016 asset register. The removal of assets from the register decreased property, plant and equipment by R 7 894 and increased loss on disposal of assets by R 7 894.

6. Buildings

Land occupied by Secunda Lapa 2 was sold in 2006, the land was removed from the asset register however the building associated with the land was not removed from the asset register. The effect of the correction decreased buildings by R 86 034, decreased depreciation by 17 577 and increased retained opening balance by R 70 407.

Correction of communications of findings 12 of 2016 on buildings depreciation which was incorrectly captured as a credit instead of debit. The effect of the correction resulted in the increase in depreciation and decrease in property, plant and equipment by R 33 204.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

50. Prior period errors (continued)

7. Investment Property

The asset management policy was changed to account for sale of properties in full when the full payment is made and the deed of sale is signed. The effect of the correction resulted in a decrease in investment property by R 180 000, and opening accumulated surplus decrease by R 180 000.

8. Consumer debtors

Consumer accounts were incorrectly billed in previous year due to various reasons i.e. incorrect tariff charged, incorrect readings, supplementary valuations etc., the correction of the error resulted in decrease in consumer debtors by R 32 158 025, decrease in receivables from non exchange by R 1 339 231, decrease in long term receivables by R 51 601, increase in property rates revenue by R 1 091 776, decrease in service charges by R 28 661 034, decrease in VAT liability by R 3 445 390, and increase in rental income by R 282 098.

9. Other income

Licence fees for municipal cars registration for previous year which were not removed from the suspense vote to licencing income. Amount for registration of municipal car for June 2016 has been recognised in July 2017, which overstated the licensing fees of 2016/17 year.

Library fees to the value of R 68 442 were incorrectly recorded as Sundry deposit in statement of Financial Position instead of income. The effect increased income from agency fees by R 72 328, Other income increased by R 68 442 and Payables from non-exchange transactions decreased by R 140 770.

Retention liability to the value of R 59 893 was erroneously not written off in the previous financial year. The correction resulted in an increase in other income and decrease in trade and other payables by the same amount.

10. Bulk purchases water

In 2014 consultation processes by Rand water Eskom informed them that the electricity tariff will increase by 15% however NERSA approved a 10.05% increase. The adjustment there-of resulted in an adjustment of 4.6cents per kilolitre on the sales tariff invoiced to customers. As a result Rand Water refunded the municipality the over invoiced amounts. The impact there-of resulted in an increase in opening accumulated surplus by R 3 387 561, decrease in Trade and other receivables by R 11 378 415 Increase in VAT liability by R 1 335 731.73 and decrease in bulk purchases by R 6 448 688.

51. Comparative figures

Certain comparative figures have been reclassified.

52. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by council.

Market risk

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

54. Events after the reporting date (continued)

The following items were written off by council subsequent year end in the council sitting held on the 29 August 2017 through council resolution A78/08/2017, subsequent adjustments were made in the annual financial statement:

Movable and intangible assets

Total number of 4511 assets with a carrying value of R 2 505 112 was identified for write off on the fixed assets register and the annual financial statements. The write-off was as a result of the following:

- Assets kept on the register however could not be found during the physical verification for three consecutive financial years.
- Assets written off by insurance company
- Assets lost
- Laptops disposed to outgoing councillors.

Investment property and land

Total number of 53 assets with a carrying value of R 2 837 674 was identified for write off on the fixed assets register and the annual financial statements. The write-off was as a result of the following:

- Property descriptions that could not be traced on the deeds due to the fact that the township was relayed out and subsequently consolidated
- Properties which were erroneously kept on the register whereby RDP houses were approved by the department of human settlement
- The Land register erroneously included properties which are privately owned and the municipality has no control over those properties

Landfill Sites

Total of 3 landfill sites assets with the carrying amount of R 145 070 which were stolen during the year which were reported to the insurance company.

Buildings

The building register included Secunda Lapa 2, the land where the Lapa was erected was sold to Velvet Moon Properties 55 Pty (Ltd) in terms of a signed agreement in 2006. The land was removed from the register; however, the building was erroneously left on the register and was demolished by the owner of the Land.

Library Books

Total number of 2254 assets with a carrying value of R 187 851 was identified for write off on the fixed assets register and the annual financial statements. The write-off was as a result of the following:

- 437 books that could not be found during physical verification for three consecutive financial years, i.e. 2015, 2016 and 2017.
- donation of 1 817 books that are mutilated due to heavy or regular use by library users.

Retentions

An unclaimed retention to the value of R 337 879.48 was written off as per the retention policy of council.

The retention policy approved by council states that "it is the responsibility of the contractor to submit a claim for the retention once the defects liability period has lapsed. Unclaimed retentions which is over two (2) years after the defect liability period will be written off based on this policy and amount written off from the retention register and municipality's accounting records

Inventory

An amount of R593 673.84 was written off due to stock count variances identified during physical between actual stock on the floor and SEBATA financial management system

Consumer debtors

Council approved 927 write-off total amount of R 10, 816, 645-90 in respect of the Irrecoverable Bad Debt registered indigents, against the provision for bad debt in terms of Sections 25 of the Credit Control & Debt Collection Policy due to the following :

- In 2016/2017 the council has approved 4339 indigent applications write-off to the value of R 45 208 904.44 as per Council Resolution A10/01/2017, when the list was submitted to the Council for approval it was noted that the list had only current balances of R 45 208 904.44 and the balances on the loan accounts were not included to the value of R 10 816 645.90.
- Loan accounts consisted of the debtors handed over to our collection agencies or debtors who signed arrangements before they were approved as indigents.

Irregular expenditure

Irregular expenditure amounting to R142 191 756 were approved for write-off by council.

-Included in the opening balance of R92 239 723 is additional irregular expenditure amounting to R60 177 377 from the

54. Events after the reporting date (continued)

previous financial year that was raised by the Auditor General during the audit.

Deviations

Section 4(2)(1) of the Supply Chain Management Policy read with item 26(2) of Municipal Supply Chain Regulation states that the accounting officer may dispense with the official procurement processes and must record reasons and report to the next Council Meeting and include as a note in the Annual Financial Statements. The total amount of R 2 375 050 incurred as a result of emergencies, services received from sole proprietors and where it was impractical to follow SCM processes was disclosed and reported.

Fruitless and wasteful expenditure

Fruitless and Wasteful Expenditure Register incurred during the 2016/2017 financial year amounting to R 32 393 223 was approved for write-off by council.

Fruitless and Wasteful Expenditure was incurred due to late payments of service providers mainly Eskom, Auditor General and Rand Water accounts and late payments are the results of cash flow constraints.

Unauthorised expenditure

Unauthorized expenditure to the value of R 596 991 924 (2016: R 2 432 461) was approved by council for write off.

- The unauthorised expenditure of 2017 amounting to R 596 991 924 was as a result of the differences identified between the budgeted amounts and actual amounts, of the approved amount only R 180 799 770 was disclosed, i.e. due to the fact that the remaining R 416 192 153 is comprised of the non-cash items.

- The unauthorised expenditure of 2016 amounting to R2,432,461.82 for the year ended 30 June 2016 as disclosed on the financial statements as a result of year end provisions on Long term service awards and Employee benefit obligations from the actuarial valuation report prepared annually for the municipality by Actuaries.

Non adjusting events

At the Extra Ordinary Council Meeting of the 15th of August 2017, the council of Govan Mbeki Municipality resolved through resolution number CA12/08/2017 to appoint Mr BM Mhlanga as the Acting Municipal Manager.

55. Unauthorised expenditure

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

59. Budget differences (continued)

The changes in the original budget, final budget and actual figures are as a result of virements and transfers done to cater for year end accrual journals, impairment journals, land fill site finance cost and year end assets journals. All budget fluctuations above 10% in comparison to actual results for the year were considered material and are explained below

Service charges

Less income realised than anticipated, which is also associated with distribution losses realised on electricity and water.

Rental of facilities & equipment

Renewal of lease contracts by tenants and less bookings received for rental of halls and municipality facilities

Interest earned on outstanding debtors

Increase in interest is related to increase in the debtors.

Income from agency services

Less income realised than anticipated due to decrease vehicle registrations and closure of licensing office due to ENATIS system technical interruptions.

Administration and management fees

Administration fees mainly relates to cut-off and reconnection fees. Less income realised than anticipated due to lesser cut-offs.

Fees earned

less income realised than anticipated.

Incidental income

More income realised than anticipated. Monies recovered from the department of Safety and Liason which was not budgeted for.

Other Income

The actual income include surplus from Landfill site provision and retention write-off not budgeted for.

Interest earned on external investments

Lesser interest received due to lesser cash balances

Dividends

Less income realised than anticipated.

Fines

Less fines charged to transgressors

Insurance claims received

Less insurance incidents claims reported in the current year

Property rates

Less property rates income realised than anticipated.

Bulk purchases

Increase in demand, annual increase of the Eskom tariffs and the distribution losses.

Govan Mbeki Municipality

Annual Financial Statements for the year ended June 30, 2017

Notes to the Annual Financial Statements for the year ended 30 June 2017

Figures in Rand

59. Budget differences (continued)

Collection cost

Less use of service providers for collection hence reduction in the cost compared to actual budget.

Contracted services

Increase in legal fees than anticipated as a result of increase in number of legal cases.

Debt impairment

More debtors were long outstanding and payment were not made which increased the impairment.

Finance charges

Finance charges incurred mainly as a result of the Eskom interest which was not budgeted for.

Other expenditure

Donation of R57,147,850 where the municipality was giving the land to schools.

Repairs & Maintenance

Cash flow constraints, resulting in low spending

Transfers and grants

Increase in indigent database compared to what was budgeted for.

Loss on disposal of assets

Losses realised on disposal of SUB-Economic assets not budgeted for.

Actuarial losses

Actuarial losses incurred as a result of provision on employee benefit and long service award liability.

Fair value adjustments

Fair value adjustment as a result of investment property values aligned to the valuation roll.

Short term receivables

Long term debtors moved from long term to consumer debtors

Investment property

Investment property decreased as a result of unbudgeted donations made during the year

Long term receivables

Long term debtor has been moved from long term to current debtor

Other financial liabilities

Loan redeemed in the current year

Payables from exchange transactions

Increase as a result of major increase in normal creditors which are not paid as result of cash-flow constraints.

Payables from non-exchange transactions

The balance mainly include unknown deposits, more receipts were allocated than anticipated

Long service award liability

Increase in provision of long service liability than anticipated
